EXPERIENCE

Executive

Google Developer Student Club, 2023 - Present

As a GDSC executive and graphic designer, I led tech initiatives, coding events, and workshops to foster a tech community, while creating digital designs that matched our club's vision.

Vision Centre Associate

Walmart, 2021- Present

In my role, my strength in one-on-one communication was key to understanding customer needs, leading to effective sales and high customer satisfaction.

SKILLS

Programming Languages

Objected Oriented Languages

- C/C++/Python

Web Development Languages

- HTML/CSS/BOOTSTRAP/JAVASCRIPT

Other Languages

- Assembly

Software Proficiency

Programming/Web Development

- VS Code/Figma/Photoshop

PROJECTS

Website Projects

Personal Projects, 2023 - 2024

Designed and developed multiple websites utilizing HTML, CSS, Bootstrap, and JavaScript. Applied Bootstrap for efficient styling and responsiveness. JavaScript was employed to add interactivity and improve user engagement.

Multi-level Cache System

Operating Systems, 2023 - 2023

Developed and managed multiple cache projects using C/C++ programming language. Implemented a cache system with features such as LRU and LFU eviction policies. Utilized structures and dynamic memory allocation to organize cache sets, lines, and blocks efficiently.

AVL Tree Data Structure

Data Structures and Programming, 2022 - 2023

Implemented Wordlist class using AVL tree data structure, eliminating reliance on vectors, arrays, or linked lists. Developed constructors to create empty Wordlist objects and parse words from files. Ensured memory leak prevention and rigorously tested code for correctness.

RISC-V Processor

Operating Systems, 2023 - 2023

Developed a RISC-V processor in C/C++/Assembly. Implemented RISC-V instructions with custom slt-type instructions. Created ECALL instruction to support system calls. Decoded and printed output for a concise representation of executed instructions.

EDUCATION

B.Sc Computer Science

Simon Fraser University
2022- Present
